IN THE CLAIMS:

Please amend claims 10, 24 and 35 and cancel claims 23 and 42 in accordance with the following listing showing the amended claims.

- 10. (Twice Amended). A method for Enhancing the Visibility of images, comprising:
- a) Focusing an image upon a plurality of pixels;
- b) for each pixel of said plurality of pixels, determining the intensity of the light that falls upon the pixel; and
- c) adjusting each pixel's effect on light as a function of the intensity determination corresponding to that pixel, wherein each pixel's effect on light is controlled by the pixel's own embedded light sensitive element.
- 24. (Amended Once) The method of claim 23 10, wherein the embedded light sensitive element comprises a transistor.
- 35. (Amended Once) A light controlled panel comprising: a plurality of pixels:

for each pixel of said plurality of pixels, means for determining the intensity of light that falls upon the individual pixel; and

means for adjusting each pixel's effect on light as a function of the intensity determination corresponding to that pixel, wherein said means for adjusting each pixel's effect on light comprises a plurality of control devices.
